

redblue energy offers the latest generation of home technology and all that goes with it:

- **energy-efficient heating, air-conditioning and ventilation technology,**
- **modern sanitary facilities and**
- **innovative electrical engineering and control technology**

all perfectly coordinated and from one source – combined with a comprehensive service that ensures the permanent functioning of the technical equipment.

Our name says it all: **red** stands for cosy warmth. **Blue** for pleasant coolness. The fresh **green** and the butterfly are part of our brand identity and a symbol of our responsibility towards the environment and climate protection.

Comfort and a healthy living environment are not a luxury, but rather the cornerstones of a refined life-style. It is our goal to meet this demand by providing a maximum of energy efficiency and constantly improving ourselves.

Cosy warmth.
 Pleasant coolness.
 Efficient energy.

O.K., we can do that!

Great climate
under the sign
of the butterfly.

Is it possible to combine one's desire for a **cosy warm home** in winter or **refreshing coolness** in summer with one's responsibility towards the **environment and the protection of the climate**? We say YES.

With 'redblue energy' a company is introducing itself that meets with extraordinary success the requirements for trendsetting heating, air-conditioning, sanitary and electrical installations and, in so doing, focuses on the sustainable use of natural resources. The redblue butterfly points the way for this.

While most customers have to coordinate various home technology specialists themselves, 'redblue energy' offers all services from one source – all over Europe. The customer can therefore be sure that all components work together perfectly and that maximum energy efficiency is achieved.

In addition to turnkey-ready home technology, 'redblue energy' also offers a service that sets new standards in the trade. Besides focusing of reliability and cleanliness, we place particular emphasis on operational convenience and an efficient emergency service.

At the end of the day our customers are not only always highly satisfied and feel comfortable in their homes, they also fulfil their responsibility towards the environment.
